We are founded in year 1994 as family company.

With our own effort and constant innovations we are becoming recognizable manufacturer of urban equipment, children playgrounds and sport playgrounds.

With successful work on equipping urban areas, parks and playgrounds we outgrow to an factory with over 40 professional and qualified workers, and with our own development and recognizable design solutions.

With functional and aesthetic attractive products we keep up with all trends in equipping urban areas, parks and playgrounds by keeping quality and longevity.

Manufacturing site with over 500 m², modern technology and qualified staff provided that we have manufacture program with over 200 products and annually adopt over 20 new products.

2009 year we introduced certificates ISO 9001:2008 i ISO 14001:2004.

We are actively participating in promoting ecology, healthy living and supporting local sport community.

ALL PRODUCTS 100% RECYCLABLE.

BENCHES WITH SEAT AND BACKREST MADE OF ALUMINUM PROFILES HAVE 10 YEAR GUARANTEE.

For manufacture of all our products we use materials that guarantee long period of use, enables recycling and aesthetically fits into every environment.

Materials that we use:

- steel profiles
- aluminum profiles
- wood by choice
- safety glass (tempered, laminated or plexiglass)
- polyester, polycarbonate

All of our products we protect with ecological colors and with powder coating on surface prepared by zinc plating or sandblasting.

Choice of colors is by RAL.

For products that use lights, besides classical, we use most modern LED technology with possibility of solar charging.

SHELTERS

Always a welcome place for rest and protection from sun, rain, wind and other weather conditions. Cutting edge design with exceptional quality and durability are just some of the attributes ascribed to our shelters. Shelters are designed and manufactured entirely in our factory. Large selection of materials, superior technology and professional team guarantee quality, longevity and aesthetic appeal of our shelters. With a large selection of shelters we offer the possibility to customize products according to customer requirements.

TRASH CANS

The trend of increasing environmental awareness with each day presents us a new challenge. Preservation and maintenance of the areas in which we spend our time is our responsibility and our requirement to fulfill it, is the appropriate infrastructure that will enable it. Trash cans that we offer are designed to be aesthetically and visually fit in all environments, from the modern urban areas up to walkways by the calming nature. By fulfilling all these requirements we always put a special emphasis to quality, innovation and functionality.

BENCHES

They are our favorite place for rest in the countryside or urban environment. The benches are also a great feature in the design of any urban area, parks, walkways... Our innovative ideas and cutting-edge design elevate arrangements of areas to a completely new level. All our benches besides great design and quality also deliver the ergonomic seating solutions that make seating enjoyable.

BICYCLE RACKS

The trend of healthier living, greater mobility, cost of transportation and many factors leading to significant increase of cyclists in traffic. In accordance with these increases the demand for convenient place to store bikes, rest from riding bikes or storage during periods when not in use. Among our products you will find many solutions for storage, parking or warehousing bikes, excellent in quality and workmanship, designed to fit into any environment, high resistance to all weather conditions and vandalism.

BILLBOARDS AND DISPLAY CASES

Advertising panels and display cases are designed for advertising in all areas. These products provide easy customized advertising requirements. For advertising showcases enlightened with the LED lighting we are able to offer photovoltaic cells, so that they can be set regardless of the existing infrastructure. All products are developed in our factory, with special emphasis on safety of use, functional and appealing design and high resistance to vandalism.

LIGHTING POLES

Luminaries that we use are environmentally friendly, durable and technologically developed. These products bring many benefits from an attractive design, outstanding quality and long life to cost savings and rational use of energy. Lighting poles are suitable for all public areas, adjustable height and low consumption.

ECO PROGRAM

The concept of ecology today, more than ever before is coming to prominence. This is particularly pronounced in public areas. Large load on public spaces with containers and trash cans leads to disruption of their appearance, odors, scattering of waste ... Lets strengthen together environmental awareness, put in order public spaces the make them cleaner and nicer for us, and for the future generations.

KIOSKS AND STANDS

Kiosks and booths are intended to set up on the market and other public areas. These products enable marketers to highlight their company and their products , and present in a direct way. Great attention was paid also to the quality, safety and resistance to vandalism. All these products are designed and manufactured in our factory, allowing potential customers series of adaptations depending on the purpose for which they want to use.

OTHER

During arranging of the environment it is necessary to pay attention to every detail, whether it is aesthetic, functional or safety aspects. Here we have prepared for you a multitude of products that are characterized by design, innovation and longevity. As with the rest of the production program of our company, and here the emphasis is placed on both the quality and durability, and also safety when using our products.

CHILDREN'S PLAYGROUND

Variety of game-play suited for all age groups of children. This game-play has been designed with an emphasis on active play and socialize, all while providing security against accidents. Variety of game-plays allows our clients unlimited possibilities in the planning, from small and simple playgrounds to large parks with a lot of content. As with the rest of the production program of our company, and here the emphasis is placed on both the quality and durability, and also safety when using our products.

PLAYGROUNDS FOR CHILDREN WITH DEVELOPMENTAL DIFFICULTIES

Our playground for children with difficulties in development are designed to provide a smooth and safe play, and interactive socialisation with other children. All playgrounds are made to be accessible and allow the game to children in wheelchairs. When designing playground special attention was devoted that in the game all children can participate, and provide interactive play and socialization of children with developmental disabilities with other children.

SPORTS PROGRAM

In both top athletes and recreational, success is driven by performance. This is especially true for sports activities. In the competition between public and private sector, sport and leisure are the terms in demand, and innovative ideas make sports grounds more attractive to participants. Enjoy a perfectly designed sport program that we offer.

OUTDOOR FITNESS STREET WORKOUT

Fitness apparatus are designed for recreation and exercise in open spaces. These devices and sets are ideal for strengthening and stretching of all muscle groups, and are appropriate for training active athletes and recreational activities for the population. Using the device increases strength and stamina, stretch muscles and joints and increase flexibility, balance and coordination of the human body, also strengthens the heart and lung function.
